

CONSERVATION MEASURE 33-03 (2013)^{1,2}
Limitation of by-catch in new and exploratory fisheries
in the 2013/14 season

Species	by-catch
Area	various
Season	2013/14
Gear	all

1. This conservation measure applies to new and exploratory fisheries in all areas containing small-scale research units (SSRUs) in the 2013/14 season, except where specific by-catch limits apply.
2. The catch limits for all by-catch species are set out in Annex 33-03/A. Within these catch limits, the total catch³ of by-catch species in any SSRU or combination of SSRUs, as defined in relevant conservation measures shall not exceed the following limits:
 - skates and rays 5% of the catch limit of *Dissostichus* spp. or 50 tonnes, whichever is greater;
 - *Macrourus* spp. 16% of the catch limit for *Dissostichus* spp. or 20 tonnes, whichever is greater;
 - all other species combined 20 tonnes.
3. For the purposes of this measure ‘*Macrourus* spp.’ and ‘skates and rays’ should each be counted as a single species.
4. On all vessels, all skates and rays must be brought on board or alongside the hauler to be checked for tags and for their condition to be assessed. Recaptured tagged skates and rays, as per Conservation Measure 41-01, Annex 41-01/C, paragraphs 2(v) and (vii), should not be re-released. Unless otherwise specified by scientific observers, all other skates and rays caught alive and with a high probability of survival should be released alive, by vessels, by cutting snoods, and when practical, removing the hooks, and the number should be recorded and reported to the Secretariat.
5. If the by-catch of any one species is equal to, or greater than, 1 tonne in any one haul or set, then the fishing vessel shall move to another location at least 5 n miles⁴ distant. The fishing vessel shall not return to any point within 5 n miles of the location where the by-catch exceeded 1 tonne for a period of at least five days⁵. The location where the by-catch exceeded 1 tonne is defined as the path⁶ followed by the fishing vessel.
6. If the catch of *Macrourus* spp. taken by a single vessel in any two 10-day periods⁷ in a single SSRU exceeds 1 500 kg in each 10-day period and exceeds 16% of the catch of *Dissostichus* spp. by that vessel in that SSRU in those periods, the vessel shall cease fishing in that SSRU for the remainder of the season.

¹ Except for waters adjacent to the Kerguelen and Crozet Islands

² Except for waters adjacent to the Prince Edward Islands

³ Total green weight caught, excluding individuals released alive.

⁴ This provision concerning the minimum distance separating fishing locations is adopted pending the adoption of a more appropriate definition of a fishing location by the Commission.

⁵ The specified period is adopted in accordance with the reporting period specified in Conservation Measure 23-01, pending the adoption of a more appropriate period by the Commission.

- ⁶ For a trawl, the path is defined from the point at which the fishing gear was first deployed from the fishing vessel to the point at which the fishing gear was retrieved by the fishing vessel. For a longline, the path is defined from the point at which the first anchor of a set was deployed to the point at which the last anchor of that set was deployed.
- ⁷ A 10-day period is defined as day 1 to day 10, day 11 to day 20, or day 21 to the last day of the month.

ANNEX 33-03/A

Table 1: By-catch catch limits for new and exploratory fisheries in 2013/14.

Subarea/ division	Region	<i>Dissostichus</i> spp. catch limit (tonnes per region)	By-catch catch limit		
			Skates and rays (tonnes per region)	<i>Macrourus</i> spp. (tonnes per region)	Other species (tonnes per SSRU)
48.6	North of 60°S	198	50	32	20
	South of 60°S	340	50	54	20
58.4.1	Whole division	724	50	116	20
58.4.2	Whole division	35	50	20	20
58.4.3a	Whole division	32	50	26	20
58.4.3b	Whole division	0	-	-	-
88.1	Whole subarea	3044	152	430	20
88.2	Whole subarea	390	50	62	20

Region: As defined in column 2 of this table.

Rules for catch limits for by-catch species:

Skates and rays: 5% of the catch limit for *Dissostichus* spp. or 50 tonnes, whichever is greatest (SC-CAMLR-XXI, paragraph 5.76).

Macrourus spp.: 16% of the catch limit for *Dissostichus* spp. or 20 tonnes, whichever is greatest, except in Statistical Division 58.4.3a (SC-CAMLR-XXII, paragraph 4.207), and Statistical Subarea 88.1 (SC-CAMLR-XXVII, paragraph 4.162).

Other species: 20 tonnes per SSRU.
